

Report: upload instructions

Overview

- Each student must make a copy of the program at the end of the written exam
- Each student must upload on “Portale della Didattica” under section “Elaborati”
 - Complete and compiling C code of your program
 - Short report (max 2 pages) describing the solution and highlighting differences with respect to the solution handed in at the written exam
- Students that do not upload the required material will not be admitted to the oral exam
- Any material sent via other channels will be ignored
- Each student must upload **one compressed archive**

Archive name

- The archive name must be a string in the form "sXXXXXX ", where XXXXXX is the register number (e.g., s987654).
- The archive should be in one of the most common compressed formats (.zip, .rar, .tar.gz, .7z, .gzip, etc...)
- **Use the same name for the description in the upload form.**

Contents of the archive

- One main directory (same name of the archive) must include
 - The report (text or pdf format, maximum 2 pages)
 - **Compiling** and **working** C code (only *.c, *.h and *.txt for input files)
 - Upload code and report for the exercises you have done in the written exam.

Contents of the report

- A single file containing
 - A brief description of your implementation choices and the data structures you used
 - (optional) Graphical representation of the data structures, if you think it is needed for a better understanding
 - A detailed list of the relevant differences between your written exam and your implementation at home
 - Any detail you think is useful for a better understanding of your code
